OLU
KAREEM

Full Stack Software Engineer | Audio | Client Facing Operations

PROFESSIONAL SUMMARY

I'm a passionate software engineer driven by challenges and discovering creative approaches. Over the decade, I've spent my nights working in freelance audio work while spending my days at various client-facing positions. It was there where I learned what it takes to be quick, thorough, and efficient at once, while handling customers from multitudes of backgrounds in a polite, professional manner. I get excited about detail and prefer not to pass up work if I'm available to do it. My approach involves defining goals early on with my clients and using teamwork in order to find the most optimal solutions. I'm always excited to discover new creative approaches through collaboration.

PROFESSIONAL EXPERIENCE

2020 - Present

SOFTWARE ENGINEER

General Assembly, Freelance (New York City, New York/Remote)

• Used Vanilla Javascript to create a sports reference search engine. (**All-Star Reference**)
